MERDEKA

FEIODAY Malaya enters int freedom, but it has elected to remain within the British Commonwealth Nations 'as 'art independent sovereign state and thus enjoy the many advantages

The agreement under which Britain 'ngsumed 'n' tectorate over the nine! states ruled by horeditary sultany is at an end. So too, is British sovereignty over the settlements o Penang and Malacca,

To those who have worked unceasingly towards independence within the Commonwealth we offer the minimum of political

agitation and turbulence. In fact, Malaya's progress been unspectacular.

The violent demonstrations that often marked the onmarch, of some other dominions and colonies were missing. Malaya, the spite the heavy burden of the jungle war,

The honour for this achievement must necessarily go to the Tengku for it was he who, in his earliest campaign speeches, pledged himself to gain independence "without bloodshed and without bitterness."

There is, therefore, cause for celebration today and there is every indication that the various races making - up the nation appear anxious to remain on good terms with Britain and the Commonwealth.

I'm sure you'll million tiny filters extract all the harmful etc, etc." Well, this picture proves they think about it much the same as we do. The whole thing takes commercial television for a ride, and doesn't bother to bring it back. The result is terrific.

Tashlin, long recognised as one of Hollywood's top creators of comedy, and the acknowledged master of the comedy device known as the 'sight gag, packed, "Oh, for a Man!" with such gags as a big French poodle who changes his colour and wardrobe to At Miss Mansfield's changes; a series of comedy TV commercials in which, for instance, a door fails off a car under the caress of an enthusinstic car-salesman; and pop-corn popping in Tony Randall's pocket when he is embraced by Jayne Mansfield,

Clever Touch

I like all that kind of fun as well as the next, but the really elever touch is Tashlin's evaluation of success, and the stuffy little vanitles that men reckon success. Here, if I may say so, in philosophical raspherry for all those funny little men who in-flict their -insufferable vanity upon the minor denizens of the

business world. In this film, Hunter is the living parody of all such, and his great moment is the privilege of using the executive's toller. Quite honestly, I consider it satire of the highest order, because it is introduced in such n robust everyday manner. The rest of the credit must go to the

I think we might say that Jayne Mansfield's success is that she parodies her type. She is groomed and gowned in the manner of a Hollywood glamour queen who goes to New York and makes a deal with an advertising copywriter to endorse his lipstick account if he will make her Hollywood boy friend icalous. That is the first step to fame for Tony Randall, the coypwriter.

At the risk of disillusioning some bird lovers, Austin L. Rand, Chief Curator of Zoology at the Chicago Natural History Museum, has conducted some research on talkative birds.

His conclusion: "Birds don't know what they're saying." Most people realise this, but they liked to persuade themselves that sometimes their feathered friends understand a smattering of their own conversation.

Sometimes, he conceded, bird's conversation will seem to fit the occasion.

"Certain words can associated with certain conditions and appropriate phrases can crop up in some circumstances," Rand said. "And this of course is the beginning of understanding the meaning of speech."

But this is hardly as far ad-vanced as the understanding of a dog who learns to obey simple commands, Rand said, "There are some stories about birds I simply don't believe,"

striking lack of sympathy"

LES ARMOUR

once the almost legendhero of the Labour Party, and now, certainly, grand old man of Socialism, has been giving his colleagues a searching

He has been digesting the party's manifesto on ownership and he has discovered, at least once, what he cails "a striking lack of sympathy with the consumer."

These are hard words and he backs them by examining the party's policy on the coal is dustry. He concedes -- as everyone does-that the mining industry had a duty to stop the "old crude evils" which afflicted the miners.

But he notes that constant increases in coal prices have hit the domestic consumer hard: "Merciy to any m such circumstances British coal is by far the cheapest in Western Europe and coal is used with wasteful extravagance in Britain' reads rather like brutal indifference to the consumer."

No Answer

theoreticians, 'of course, have been mulling over this problem for quite a time and Mr Morrison's comments are merely strong evidence that there is considerable dissatisfaction in the party over the fact that no answer seems to have been forthcoming.

The problem is that any political party's policy must, in the end, be tailored to meet the demands of popular pressure, Voters are strongly organised into producer groups. That applies to management and

But nowhere is there-or is there likely to be-any strong organisation of consumers capable of exerting pulitical pressure. Nor is it easy to convince voters that the policies they demand as producers are likely to hurt them as consumers,

In any nationalised industry, there are two forces to be placated: the government, which demands production of a certain sort, and trade unions, who are in a position to fix wages and conditions.

Governments are in a particuly vulnerable position when trade unions take the offensive -even though the control of nationalised industries is formally in the hands of quasiindependent boards. If they yield to the trade unions, they may annoy the consumers, but, if they do not, the resultant mdustrial strife will almost certainly annoy many more voters.

It is partly for this reason that Mr Gnitskell is continuing to compaign vigorously-despite considerable opposition-for his plan to abandon outright nationalisation as a future policy and in private companies.

In this way, the public should he able to enjoy some of the artists. proceeds of successful industry without becoming a necessarily weak party to industrial dis-

Solution

The Archbishop of Canterbury has come up with a solution to the problem of inflation,

The problem, he says, is really a "moral" one and the solution is to be found in "honest work, thrift, unselfishness, service to one another, instead of strife,"

The difficulty, as the political scientists and the economists' point out, is that the Archbishop is both right and wrong.

Greed and gluttony, the two sins of economic man, are, of course, at the bottom of the problem. So, indeed, is that little mentioned deadly sin

But the difficulty is that the forces which shape a modern industrial society are impersonal, economic system under which we live is founded upon competition, The trade union movement exists entirely to exert industrial force. The assumption that that force is needed is the whole reason for its existence. Before the Archbishop's advice

could be needed the whole of the economic organisation would have to be altered radically. And the trouble is that no other economic system seems to

have come any nearer to achieving the Kingdom of Heaven.

REPORT FROM WASHINGTON

All is not Lost in the US Unions

R Walter Reuther, a shrewd man who runs the U.S. Auto Workers' Union and who is one of the great powers in the A.F.L.-C.I.O., has just decided that his men might be able to do without some money.

In any other country this might have got him locked up in a lunatic asylum. In the U.S. very few cyclushes were

It is reasonable to suppose that the spirit of Karl Marx, on hearing this, must have run off streaming into the outermost depths of Limbo; Mr Reuther's proposals merely confirm what everyone has known for a long time: U.S. trade unions believe in the capitalist system. Further-more they know what their beliefs commit them to.

Ir the automobile business, supply has outrun demand by quite a distance. The logical answer is to cut prices. But the cost, of labour has made this virtually impossible and, trade unions being as strong as they are, this cost can only be cut with their consent.

Mr Reuther has therefore prices by a reasonable amount, his union will cut its wage demands for the forthcoming contract.

thinks this very strange. If the manufacturers can't sell cars, they can't pay wages. If they can sell cars, they can pay wages. Managements and unions are, in Mr Reuther's view, partners in If is, therefore, foolish for one of them to seek to destroy the other,

So far, the automakers are considering the proposal. But if they turn it down, it will certainly not be because they think Mr Routher has stepped outside his legitimate sphere of influence, but because they different view of the market prospects-than he does.

· Crazy, ridiculous, extraordinary.... Call it what you will. But the fact remains that Britain is not likely to be represented at the European Swimming Championships in Budapest next year.

The reason? The Budapest date clashes with that of the 1958 National Championships at Blackpool in September.

So Britain, now richer in swimming talent than at any time in the past 30 years, may throw away an excellent chance of gaining some European titles,

the British Amateur Swimming victory. Association is explained by the fact that Blackpool baths are ed Wimbledon since the war. not available before September. And this year he was the oldest No other pool is large enough to competitor in the singles. accommodate the Champicaships which have

OLDEST CHAMPION At last the wise-cracking legpulling Gardnar Mulloy admitted what everyone has

always suspected. He really is

43 years old. This confession establishes the ever-young American tennis star as the oldest Wimbledon Champion in history. With Budge Patty, he won the men's doubles this year. Previously, the oldest Wimbledon title-holder was the late Arthur Gore, an Englishman

who won the singles for the third time in 1912. He was then 41-years-old. Mulloy's victory was the biggest and most pleasent surprise of this year's Wimbledon.

He had been a runner-up in the men's doubles in 1948 and 1949. But in 1957 it was felt that

UNWRITTEN LAWS

Are the unwritten laws of cricket too strictly observed? It would seem so when we look at a recent incident in the Yorkshire v Gloucestershire match. Yerkshire offspinner Ray

Illingworth dismissed two batsmen with successive balls in the arst innings and had the chance of a hat-trick when Sam Cook, one of the game's "rabbits" came to the crease.

But this was Cook's benefit match and custom decrees that the benenciary should receive a "toffce" ball, for his first delivery to get off the mark. lilingworth gallantly obliged.

Cook shared in a last wicket partnership of nine. And Gloucestershire won the match by two wickets. All football clubs, I imagine,

suffer occasionally from those know-all supporters who harass players and referee alike by shouting out advice during the of a match. But how many of these people really! know, what they are talking about?

Not many, thought officials of the French club, Troyes FC. So they have presented all their followers with a leaflet containing the most important laws of specer.

Already the advice from the stands has become more expert and referees in charge of Troyes matches have remarked most fayourably on the behaviour of the crowds. Other clubs should follow this

CHARLTON SAYS HEWIE

By BERNARD JOY

If asked to pin-point the major weakness which caused Charlton to be relegated last season, I would say poor distribution. Even Stuart Leary, whom I rate second only to Johnny Haynes in making an accurate pass at speed, was often wide of his colleagues.

There will be no shortcomings this time. Charlton have made a felish of fitness. Manager Jimmy Trotter himself is supervising and couch Jack Shreeve, the former full-back, is in charge of pressure training to spur players to greater efforts.

Superior fitness will lead to accurate passing, stamina, and self-confidence. If Charlton could have started last year with the team as it is now, they-would not have been relegated. That does not mean they are going to jump straight back, because it is easier to stay in the First Division than win the long and exacting race for promotion.

Says I. M. MacTAVISH

During a quiet conversation in a club the other day I was intrigued by a question which one of the participants saw fit to throw into the round of talk. It came after several comments had been made about the achievements of Hongkong's sportsmen. He asked "Just where does this Colony stand in relation to the rest of the world as far as present standards are concerned.....?"

I wonder how one should try to answer such a question...and fortunately it lacks the right wonder if there is a fair yardstick against which our standing can be best results. honestly assessed.

West's Error Sews Up Game

By OSWALD JACOBY

COUTH'S three-dlamond bid showed first-round control of the suit and was in the nature of a slam try. West stuck in n silly double that gave North a chance to pass.

This pass told South that North had no interest in a slam at all and South contented himself with a bid of four spades. South won the opening club lead with the ace and saw that even his game contract was doubtful. The way the cards lie South can bring it home by double dummy play against any defence but South succeeded in making five through an error by West,

He won the opening club lead and played a spade to dummy's king. He returned to

The double dummy play to make the hand against perfect defence involves the lead of the jack of hearts from dummy. There are quite a few variations undoubtedly many readers will be interested in working them out,
